

INDEX TO VOL. XCII. (A)

Address of the President, Sir W. Crookes, at Anniversary Meeting, 1915, 158.

Atmospheric electrical variations at sunrise and sunset (Nichols), 401.

Auwers (A.) Obituary notice, xvi.

Bakerian Lecture (Barkla), 501.

Ballistics, external, diagram to facilitate study of (Dalby), 329.

Barkla (C. G.) Bakerian Lecture : On the X-Rays and the Theory of Radiation, 501.

Berkeley (Earl of) and Hartley (E. G. J.) Further Determinations of Direct Osmotic Pressures, 477.

Capillary tube, theory of (Rayleigh), 184.

Chree (C.) Memorandum on the Kew Heliograph, 199.

Collision at sea, method of avoiding (Joly), 176, (Plummer), 377 ; — predictor (Joly), 252.

Colour vision, theory of (Houstoun), 424.

Crookes (Sir W.) Presidential Address, 1915, 158.

Cylinders closed by screw plugs, longitudinal strength of (Hadcock), 1.

Dalby (W. E.) A Diagram to Facilitate the Study of External Ballistics, 329.

Dearle (R. C.) Emission and Absorption in the Infra-red Spectrum of Mercury, 608.

Dielectrics, experiments on properties of (Richardson), 41 ; — flow of electricity through (Richardson), 101.

Distances at sea, method of estimating (Joly), 170.

Duffield (W. G.) The Consumption of Carbon in the Electric Arc. I.—Variation with Current and Arc-Length. II.—Influence upon the Luminous Radiation from the Arc, 122 ; — Apparatus for the Determination of Gravity at Sea, 505 ; — and Waller (M. D.) The Consumption of Carbon in the Electric Arc. No. III.—The Anode Loss, 247.

Dynamical similitude and molecular physics (Hardy), 82.

Electric arc, consumption of carbon in (Duffield), 122, (Duffield and Waller), 247.

Electric waves, transmission of, around earth's surface (Macdonald), 493.

Ellingworth (S.) See Shorter and Ellingworth.

Elliptic functions, transformation of, linkages illustrating (Hippisley), 469.

Emulsifying action of soap (Shorter and Ellingworth), 231.

Fluid motion, discontinuous, past a curved boundary (Levy), 285.

Frequency distributions, "probable errors" of (Isserlis), 23.

Friction experiments in pipes (Lander), 337.

Frictional resistance to motion of elongated body through a fluid (Lees), 144.

Functions, converging sequences in oscillating successions of (Young), 353.

Goodson (H. E.) See Lockyer and Goodson.

Gravity, apparatus for determination of, at sea (Duffield), 505 ; (Schuster), 517.

VOL. XCII.—A.

f

- Hadcock (A. G.) On the Longitudinal Strength of Cylinders closed by Screw Plugs, 1.
- Hardy (W. B.) An Application of the Principle of Dynamical Similitude to Molecular Physics, 82.
- Hartley (E. G. J.) See Berkeley and Hartley.
- Helmholtz resonator, theory of (Rayleigh), 265.
- Hippisley (R. L.) Linkages illustrating the Cubic Transformation of Elliptic Functions, 469.
- Houstoun (R. A.) A Theory of Colour Vision, 424.
- Hydron regulators, partly neutralised mixtures of acids as (Prideaux), 463.
- Ignition of gaseous mixtures, electrical, reaction between gas and pole in (Thornton), 9 ;
— of gases by electrical discharge (Thornton), 381.
- Ionising potentials for magnesium, etc. (McLennan), 305, 574.
- Iron, oxy-hydrogen flame spectrum of (Lockyer and Goodson), 260.
- Isserlis (L.) On the Conditions under which the "Probable Errors" of Frequency Distributions have a Real Significance, 23.
- Joly (J.) On a Method of Estimating Distances at Sea in Fog or Thick Weather, 170 ;
— On a Method of Avoiding Collision at Sea, 176 ; — A Collision Predictor, 252.
- Jones (R.) The Motion of a Stream of Finite Depth past a Body, 107.
- Kew heliograph, memorandum on (Chree), 199.
- Keys (D. A.) See McLennan and Keys.
- Lander (C. H.) Surface Friction : Experiments with Steam and Water in Pipes, 337.
- Lees (C. H.) On the Effect of the Form of the Transverse Section on the Frictional Resistance to the Motion of an Elongated Body Parallel to its Length through a Fluid, 144.
- Legendre's function $P_n(\theta)$ (Rayleigh), 433.
- Levy (H.) Discontinuous Fluid Motion past a Curved Boundary, 285.
- Lightning, sign and magnitude of electric discharges in (Wilson), 555.
- Linkages illustrating transformation of elliptic functions (Hippisley), 469.
- Liquid possessing vorticity, motion of solids in (Proudman), 408.
- Lockyer (Sir N.) and Goodson (H. E.). On the Oxy-hydrogen Flame Spectrum of Iron, 260.
- Macdonald (H. M.) The Transmission of Electric Waves around the Earth's Surface, 493.
- McLennan (J. C.) On the Single-line Spectra of Magnesium and other Metals and their Ionising Potentials, 305 ; — On the Ionisation Potentials of Magnesium and other Metals, and on their Absorption Spectra, 574 ; — and Keys (D. A.) On the Ionisation of Metallic Vapours in Flames, 591 ; — and Thomson (A.) On the Bunsen Flame Spectra of Metallic Vapours, 584.
- Magnetic shielding of large spaces (Wilson and Nicholson), 529.
- Magnetic surveying, portable variometer for (Walker), 313.
- Mason (W.) On Speed Effect and Recovery in Slow-speed Alternating Stress Tests, 373.
- Membranes, microscopic structure of semipermeable (Tinker), 357.
- Mercury, emission and absorption in infra-red spectrum of (Dearle), 608.
- Merton (T. R.) On the Structure of Broadened Spectrum Lines, 322.
- Metallic oxides, reduction with hydrogen at high pressures (Newbery and Pring), 276.

- Metallic vapours, Bunsen flame spectra of (McLennan and Thomson), 584 ; — ionisation of (McLennan and Keys), 591.
- Minchin (G. M.) Obituary notice of, xlv.
- Molecular configuration in three dimensions of space (Ramsay), 451.
- Molecular physics and dynamical similitude (Hardy), 82.
- Newbery (E.) and Pring (J. N.) The Reduction of Metallic Oxides with Hydrogen at High Pressures, 276.
- Nichols (E. H.) Investigation of Atmospheric Electrical Variations at Sunrise and Sunset, 401.
- Nicholson, (J. W.) See Wilson and Nicholson.
- Nitrogen, active modification of (Strutt), 438.
- Obituary Notices of Fellows deceased :—
- | | |
|----------------------------|----------------------|
| Poynting, John Henry, i. | Auwers, Arthur, xvi. |
| Tennant, James Francis, x. | Rucker, Sir A., xxi. |
| Sell, William James, xiv. | Minchin, G. M., xlv. |
- Osmosis, part played by surface forces in (Tinker), 357.
- Osmotic pressures, determination of (Berkeley and Hartley), 477.
- Pathometry, application of theory of probabilities to (Ross), 204.
- Plummer (H. C.) On Prof. Joly's Method of Avoiding Collision at Sea, 377.
- Poynting (J. H.) Obituary notice of, i.
- Prideaux (E. B. R.) On the Use of Partly Neutralised Mixtures of Acids as Hydrion Regulators, 463.
- Pring (J. N.) See Newbery and Pring.
- Probabilities, theory of, application to study of pathometry (Ross), 204.
- Proudman (J.) On the Motion of Solids in a Liquid Possessing Vorticity, 408.
- Ramsay (Sir W.) A Hypothesis of Molecular Configuration in Three Dimensions of Space, 451.
- Rayleigh (Lord) On the Theory of the Capillary Tube, 184 ; — The Theory of the Helmholtz Resonator, 265 ; — On Legendre's Function $P_n(\theta)$, when n is great and θ has any value, 433.
- Resonator, Helmholtz, theory of (Rayleigh), 265.
- Resonator with circular aperture, period of (White), 549.
- Richardson (S. W.) Some Experiments on the Properties of Dielectrics, 41 ; — The Flow of Electricity through Dielectrics, 101.
- Ross (Sir R.) An Application of the Theory of Probabilities to the Study of *a priori* Pathometry.—I, 204.
- Rucker (Sir A.) Obituary notice of, xxi.
- Schuster (A.) On the Determination of Gravity at Sea (Note on Dr. Duffield's Paper), 517.
- Sell (W. J.) Obituary notice of, xiv.
- Shorter (S. A.) and Ellingworth (S.) On the Emulsifying Action of Soap.—A Contribution to the Theory of Detergent Action, 231.
- Spectra, single-line, of magnesium and other metals and their ionising potentials (McLennan), 305.
- Spectrum lines, broadened, structure of (Merton), 322.
- Stream of finite depth, motion of, past a body (Jones), 107.
- Stress tests, speed effect and recovery in (Mason), 373.

- Strutt (R. J.) An Active Modification of Nitrogen.—VIII, 438.
 Surface friction, experiments in pipes (Lander), 337.
- Taylor (G. I.) Skin Friction of the Wind on the Earth's Surface, 196.
- Tennant (J. F.) Obituary notice of, x.
- Terazawa (K.) On Deep-sea Water Waves caused by a Local Disturbance on or beneath the Surface, 57.
- Thomson (A.) See McLennan and Thomson.
- Thornton (W. M.) The Reaction between Gas and Pole in the Electrical Ignition of Gaseous Mixtures, 9; — The Ignition of Gases by Impulsive Electrical Discharge, 381.
- Tinker (F.) The Microscopic Structure of Semipermeable Membranes and the Part Played by Surface Forces in Osmosis, 357.
- Variometer for magnetic surveying (Walker), 313.
- Walker (G. W.) A Portable Variometer for Magnetic Surveying, 313.
- Waller (M. D.) See Duffield and Waller.
- Waves, deep-sea, caused by local disturbance (Terazawa), 57.
- White (F. P.) The Period of a Spherical Resonator with a Circular Aperture, 549.
- Wilson (C. T. R.) On Some Determinations of the Sign and Magnitude of Electric Discharges in Lightning Flashes, 555.
- Wilson (E.) and Nicholson (J. W.) On the Magnetic Shielding of Large Spaces and its Experimental Measurement, 529.
- Wind, skin friction of, on earth's surface (Taylor), 196.
- X-rays and radiation theory (Barkla), 501.
- Young (W. H.) Note on the Existence of Converging Sequences in Certain Oscillating Successions of Functions, 353.

END OF THE NINETY-SECOND VOLUME (SERIES A).
